

MGR-1D4840-2T

DUAL CHANNEL SINGLE PHASE AC SOLID STATE
RELAY (SPECIAL)

Type meaning

MGR - 1: [Single phase] - **D**: [Control voltage 3-32VDC] - **48**: [Load voltage 480VAC] - **40**: [40A] - **2T**: [Two pairs of terminals]

Features

- Rated current: 40Amps
- Rated voltage: 480VAC
- Control voltage: 3-32VDC
- Control current: $\leq 10\text{mA}$
- Two I/O channels, lead installation
- Reverse-parallel SCR as the output component can be used in commercial or heavy industrial applications with reliable performance
- "Ultra low" input current
- Low output off-state leakage current
- Low output on-state voltage drop
- Display output status via LED
- Standard output RC snubber circuit
- Each channel is independent of the other channel, and all channels are freely controllable

Notice

- If the load current is 10A, a heat sink must be equipped; if the load current is 40A or more, an air-cooled radiator or a water-cooled radiator must be installed.
- When the load is an inductive load, be sure to connect a varistor in parallel with the output terminal, whose voltage value is 1.6-1.9 times the load voltage.
