

ST5-5DD

FIVE CHANNEL DC SOLID STATE RELAY (SPECIAL)

Type meaning

ST5:[Five channels] - **5**:[5A] - **DD**:[DC-DC (DC input-DC output)]

Features

- Rated current: 5Amps
- Rated voltage: 24VDC
- Control voltage: 24VDC
- Five I/O channels
- Low-impedance MOSFET as the output component minimize the total power consumption
- Low output off-state leakage current
- Low output on-state voltage drop
- Five separate LED output states
- Each channel is independent of other channels, and all channels are freely controllable
